I tried resetting Firefox and that worked the first time, but it didnt work this morning.. It happened while downloading a bios update from Toshiba part of their desktop update I had a popup from insydeflash so I clicked on it (I got confused).. You should also give consideration to how youre going to back your system up so when the inevitable malfunction of one sort or another hits, youre not hit with a bigger disaster than need be.. If you are new to the CNET Forums, please read our CNET Forums FAQ My computer said it had an update so I downloaded Insydeflash. [Расписание Самолетов Из Омска](#)

You could do a full system scan with your antivirus program, if you suspect its not on the up and up.. Since your computer is new, its under warranty, but if you get a software problem, that warranty wont help, so be careful and back your system up regularly..
